

What Is ASQ-3™?

ASQ-3 is a set of questionnaires about children's development. It has been used for more than 20 years to make sure children are developing well. A screening provides a quick look at how children are doing in important areas, such as communication, physical ability, social skills, and problem-solving skills. ASQ-3 can help identify your child's strengths as well as any areas where your child may need support.

As a parent or caregiver, you are the best source of information about your child. That's why ASQ-3 questionnaires are designed to be filled out by you. You will only need 10–15 minutes. It's that quick and easy. Here's how ASQ-3 works:

- You will answer each question "yes," "sometimes," or "not yet," based on what your child is able to do now. Your answers help show your child's strengths and areas where he or she may need practice.
- To answer each question, you can try fun and simple activities with your child. These activities encourage your child to play, move around, and practice day-to-day skills.
- After you complete the questionnaire, a professional will share the results with you.

If your child is developing without concerns, there is nothing more you will need to do. You may try the next ASQ-3 age level as your child grows and learns new skills. There are 21 questionnaires that you can use with children from 1 month to 5½ years old. If your child has trouble with some skills, your program will help you with next steps. Finding delays or problems as early as possible supports young children's healthy development.

You are an active partner in your child's learning and development. By completing ASQ-3 questionnaires, you are making sure your child is off to the best possible start!

What Is ASQ:SE-2™?

The first 5 years of your child's life are very important. Your child's healthy social-emotional development forms a foundation for lifelong learning. ASQ:SE-2 is a set of questionnaires about behavior and social-emotional development in young children. There are nine questionnaires for different ages to screen children from 1 month to 6 years old.

ASQ:SE has been used by parents for more than 15 years. It makes sure that children's social-emotional development is on schedule. It helps you celebrate milestones while addressing any concerns as early as possible. ASQ:SE-2 can help identify your child's social-emotional strengths and areas where your child may need support.

As a parent or caregiver, you are the best source of information about your child. That's why ASQ:SE-2 is designed for you to complete. You will only need 10–15 minutes. It's that quick and easy. Here's how ASQ:SE-2 works:

- Answer each question by marking "often or always," "sometimes," or "rarely or never." Answer based on what you know about your child.
- Note if any behaviors concern you.
- Remember that your answers help show your child's strengths and areas where he or she may need support.
- After you finish, your child's provider will discuss the results with you.

If your child's social-emotional development is on target, then there is nothing more you need to do. If there are concerns, then the provider will help you with next steps. When children get support as early as possible for behavioral concerns, problem behaviors may be prevented from getting more difficult as children get older.

You play an important role in your child's learning and development. Completing ASQ:SE-2 questionnaires helps you make sure your child is off to a great start!
